## EDUCATION

Madan Mohan Malaviya University Of Technology

2025

Bachelors of Technology in Electrical Engineering - CGPA - 7.5

Gorakhpur, India

## Projects

InterviewAi | Nextjs, Tailwind, Shadcn, Clerk, PostgreSQL, Gemini API

June 2024 – Aug 2024

- Architected "InterviewAI", an **AI-powered** interview preparation platform that generates **personalized interviews** and generate **feedback to the users' answers**.
- Executed secure user **authentication and authorization** using **Clerk**, safeguarding platform access for over **1,000 active users**
- Designed and implemented a responsive UI with **Next.js, Tailwind CSS, and Shadcn components**, improving user engagement by **30%**.
- Integrated Google's **Gemini API** for AI-driven interview question generation and **Chrome's speech-to-text API** for seamless voice input, **increasing user satisfaction by 25%**.
- Leveraged **Drizzle ORM with PostgreSQL** to manage user data and interview sessions, ensuring **scalability and reliability**.
- Introduced **advanced features** for tracking user progress, delivering personalized interview tips, and generating detailed reports, resulting in a **20% improvement in user outcomes**.

TalentBridge | ReactJs, MongoDB, Express, NodeJs

Feb 2024 – April 2024

- Developed a scalable Job web application using the **MERN stack**, enhancing platform efficiency and performance.
- Implemented modular and reusable frontend components with **Shadcn UI** and styled with **Tailwind CSS**, improving development speed and consistency.
- Integrated **Redux Toolkit** for streamlined state management, resulting in a more responsive user-friendly interface.
- Built secure backend services with **Express, Mongoose, JWT, and bcryptjs**, ensuring robust user authentication and data protection.
- Managed file uploads and media content efficiently by integrating **Multer** and **Cloudinary**, supporting seamless UX.

BlogHub | ReactJs, Javascript, Appwrite

Nov 2023 – Jan 2024

- Created an interactive blogging platform, enhancing user engagement by integrating **Redux Toolkit** for state management.
- Engineered seamless data submission processes using **React Hook Form**, reducing error rates by **30%**.
- Incorporated **Tinymce** to support rich text editing, improving content creation **efficiency by 25%**.
- Streamlined client-server communication through **Appwrite**, achieving a **15% faster data exchange**.
- Optimized UI design using **Tailwind CSS**, reducing development time by **40%**

## Experience

Problem setter as a Freelancer

Aug 2022 – Apr 2023

Imocha

Hybrid

- Created **20 data structure and algorithm problems**, boosting competitive programming content.
- Resolved **100+ issues** using advanced debugging, improving challenge **accuracy and reliability**.

## Achievements

- Ranked in the top 1.3k** out of **30,000 participants** in weekly coding challenges, demonstrating advanced coding skills and strategic problem-solving capabilities that led to faster feature implementation in software projects.
- Solved over **500+** coding problems on **GeeksforGeeks**, showcasing a deep understanding of data structures.
- Knight (1850+ rating)** at **Leetcode**
- 3 star at **Codechef**, Pupil at **Codeforces**

## Technical Skills

Languages: C/C++, Python, SQL (Postgres), JavaScript, TypeScript, HTML/CSS

Frameworks: Node.js, Tailwind CSS, SCSS/SASS

Developer Tools: Git, VS Code, Visual Studio, GitHub

Libraries: ReactJs, Express
